

The Journey Continues

I don't want to be a cog in a machine. I want to be the machine.

Most people collect certificates to prove they learned something.

I collected them while trying to figure out what I was building toward.

Now I know.

The Path So Far

I started with voice commands and if-else logic. Realized I needed LLMs. Built an AI. Then built an OS around her. Then a CNC machine controlled from Telegram. Then a browser for people who hate distraction. Each project was a question I needed to answer by building.

Somewhere between the 40th certificate and the 9th project, the certificates stopped being the point.

The building became the point.

2020–2024 — 33 certifications. Exploring everything. Committing to nothing yet.

2025 — 18 more. Starting to see the shape of what I actually want.

2026–Present — Books, communities, real projects. The actual work begins.

Projects

AI & Personal OS

Project	What it is
Marin_OS	A minimal Debian-based OS where an AI is the system owner. i3, Auto-RAG, health monitoring, web UI. My first real system — where I learned that controlling computers with code is just the beginning.
Marin Evil Sentinel	An AI that doesn't let you slack. Tracks your progress, pushes back, removes distractions. Your goals, enforced. Free to use.
Marin Kitagawa v3	VRM model support. Daily driver. Rarely pushed.
Bayazid-Marin	Two personalities, one system. One teaches and maps the path. The other makes anything understandable.

Where It Started

Project	What it is
VPA	Voice control with if-else logic. The project that taught me I needed LLMs to do this right. The wrong tool for the job is sometimes the best teacher.

Web & Browser Tools

Project	What it is
SwordFish	A browser built for focus. Ad-blocker, PDF tools, video downloader, archive support. Built it because nothing else worked the way I needed.
web based terminal	

Project	What it is
	Flash ATmega chips from a browser. No desktop IDE, no friction.

Hardware

Project	What it is
CNC Math Plotter	Write an equation. Watch a machine draw it. Controlled from Telegram. NLP-parsed input. A physical Desmos.

Tools

Project	What it is
Tools	Things I built because I needed them. Automation, shortcuts, little systems that save hours.

Certifications

Not the point anymore. But they mark where I've been.

Programming

Python — 5 certificates

| Certificate | Platform | Date | |-----|-----|-----| | Introduction to Python | SoloLearn | July 2024 | | Python Developer | SoloLearn | September 2024 | | Python Fundamental | Programming Hero | July 2024 | | Python Intermediate | Programming Hero | July 2024 | | Functions in Python | Great Learning | September 2024 |

C Programming — 4 certificates

| Certificate | Platform | Date | |-----|-----|-----| | Introduction to C | SoloLearn | June 2023 | | C Intermediate | SoloLearn | June 2024 | | C Fundamental | Programming Hero | June 2024 | | Exploring C | Coursera / University of Michigan | August 2024 |

Java & Arduino — 3 certificates

| Certificate | Platform | Date | |-----|-----|-----| | Introduction to Java |
Coursera / LearnQuest | April 2025 | | The Arduino Platform and C
Programming | Coursera / UC Irvine | March 2025 | | Interfacing with the
Arduino | Coursera / UC Irvine | March 2025 |

Blockchain — 1 certificate

| Certificate | Platform | Date | |-----|-----|-----| | Blockchain and
Cryptocurrency | Programming Hero | July 2024 |

Networking & Linux

Networking — 4 certificates

| Certificate | Platform | Date | |-----|-----|-----| | Computer Networking |
Coursera / Illinois Tech | March 2025 | | Packet Switching Networks and
Algorithms | Coursera / University of Colorado | March 2025 | | Networking
Fundamentals | Coursera / Akamai | March 2025 | | The Unix Workbench |
Coursera / Johns Hopkins | March 2025 |

Linux — 2 certificates

| Certificate | Platform | Date | |-----|-----|-----| | Hands-on Introduction
to Linux Commands and Shell Scripting | Coursera / IBM | March 2025 | | Linux
Server Management and Security | Coursera / University of Colorado | April
2025 |

Cybersecurity

Security — 4 certificates

| Certificate | Platform | Date | |-----|-----|-----| | Foundations of
Cybersecurity | Coursera / Google | March 2025 | | Network Security |
Coursera / ISC2 | March 2025 | | Introduction to Cyber Attacks | Great Learning
| November 2024 | | Types of Cyber Security | Great Learning | August 2024 |

IoT & Embedded Systems

IoT — 2 certificates (both With Honors)

| Certificate | Platform | Date | |-----|-----|-----| | IoT Cloud | Coursera /
UIUC | April 2025 | | IoT Devices | Coursera / UIUC | March 2025 |

AI & Emerging Technology

AI — 4 certificates

| Certificate | Platform | Date | |-----|-----|-----| | Prompt Engineering |
Programming Hero | June 2024 | | ChatGPT for Beginners | Great Learning |
August 2024 | | How to Build your own Chatbot using Python | Great Learning |
November 2024 | | Tech for Everyone | SoloLearn | June 2024 |

Web Development

Web — 3 certificates

| Certificate | Platform | Date | |-----|-----|-----| | Introduction to HTML |
SoloLearn | August 2023 | | Introduction to CSS | SoloLearn | July 2024 | |
Landing Page | Coursera | 2024 |

Business & Management

Management & Leadership — 5 certificates

| Certificate | Platform | Date | |-----|-----|-----| | Introduction to
Management | Great Learning | August 2024 | | Principles of Management |
Great Learning | August 2024 | | Principles of Leadership | Great Learning |
October 2024 | | Market Research | Great Learning | November 2024 | | Green
Start-Ups | futurenation / UNDP Bangladesh | August 2025 |

Design, Marketing & Databases

3 certificates

| Certificate | Platform | Date | |-----|-----|-----| | UI/UX Design |
futurenation / Creative IT Institute | August 2025 | | Digital Marketing |
futurenation / Grameenphone | December 2025 | | SQL | Mimo | August 2023 |

DevOps

GitHub — 1 certificate

| Certificate | Platform | Date | |-----|-----|-----| | GitHub Tutorial for
Beginners | Great Learning | November 2024 |

Internships

2 certificates

| Certificate | Organization | Date | |-----|-----|-----| | Industrial
Training — Maintenance (Mechanical) | BSRM | February – March 2026 | | AI
Powered Data Analysis — Star Performer | RIT / Excelerate | February 2026 |
